

Trident Calibration Labs provide complete calibration, repair, and metrology solutions of electrical, mechanical, dimensional, and process control equipment to meet the high standards of documentation and quality requirements of our wide range of customers. We understand the importance of quality, accuracy and affordability with your time sensitive equipment and we strive to meet and exceed these requirements each and every day.

Trident Calibration is ISO9001-2008 Certified and our calibration services are provided in accordance with the applicable requirements of ANSI/NCSL Z540-1 and ISO/IEC 17025, using standards that are traceable to NIST or compared to nationally and internationally recognized standards. We provide pick-up and delivery services free of charge in our local areas as well as on-site support at your location.

At Trident Calibration our focus is on you, our customers. Our mission is to not only meet your needs and requirements, but to do so in a way that demonstrates our commitment to you with every piece of equipment serviced.

Trident Calibration Labs
is 100% Veteran Owned

Service Offerings

Calibration & Repair

- Comprehensive Range of Metrology Services
- Quality Programs to Meet Customer Requirements
- Calibration & Repair for Thousands of Manufacturers
- Broad Base in Diverse Industries

Depot Service

Highly trained technical resources provide expertise in delivering calibration and repair services for a wide array of test equipment products and manufacturers.

On-Site Service

Trident Calibration offers On-Site Services to the entire United States. Our highly trained technicians will service your company's calibration needs right inside your facility.

Total Lab Management Solutions

Trident Calibration Labs offers Total Lab Management Solutions to help customers focus on the right business strategies, to establish and meet financial targets and achieve operational objectives.

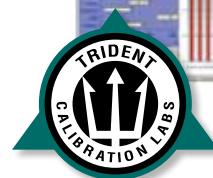

Repair Services

- No-Charge Evaluation
- Fault Isolation & Replacement of Failed Parts
- Quick Turnaround Time
- 25% OEM Savings with Coordination through your local representative

Additional Services

Our breadth of capabilities is further enhanced by additional services that enable customers to successfully manage their test instruments:

- Automatic Equipment Recall
- Field Service Kitting & Management
- Asset Management Programs
- Customized Equipment Management Reporting

Capabilities

Radio Frequency / Microwave

Trident Calibration provides RF and microwave service up to 26.5Ghz, regardless of the manufacturer... Including On-Site Service!

Telecommunications Test Equipment

Trident Calibration provides calibration and repair services for all of your communications test equipment.

General Purpose Instruments

Trident Calibration provides calibration and repair services for all of your general purpose test instruments, regardless of the manufacturer.

Physical Instruments

Trident Calibration calibrates all types of physical instrumentation including pressure, temperature, humidity, and torque, from simple gages to complex process control systems.

Dimensional Tooling

From calipers to micrometers, Trident Calibration provides support for thousands of manufactures.

Medical Test Instruments

Trident Calibration calibrates all types of medical test instruments from bio pressure meters to patient simulators.

Program Management Tools

Gage InSite Calibration Software

- Custom Configuration for all Customers
- Customer Defined Field Names & Workflow
- Can Be Used On Most Corporate Networks
- Web And Full Client Versions Available

Custom Management Reports

- Failure Analysis
- TAT Reporting
- Inventory Reporting
- Vendor Performance
- Calibration & Repair Cost
- In-Calibration Performance

Quality Programs

Quality System Compliance

In addition to ISO 9000 Registration and being 17025 Compliant, Trident Calibration Quality Systems are designed to meet the requirements of several industry specifications:
